Problem Description:

-
1. Solve the following LP using the simplex algorithm. Verify your solution using a solver of your choice.

Max.

$$z = 5x_1 + x_2$$

s.t.

$$2 \cdot x_1 + x_2 \leq 6$$

$$x_1 - x_2 \leq 0$$

$$x_1, x_2 \geq 0$$

Solution Discussion

-
- The solution produced by Gurobi Agrees with hour Simplex derives solution. Accroding to both **X1 and X2 should be 2** leading to an optimal value of **z = 12**.
